Project Design Phase
Proposed Solution Template

Date	28/09/2026
Team ID	6ab2215e11b716a3e52c637d
Project Name	Auto Ticket Classification Using Flow Designer
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Manual categorization, prioritization, and routing of incoming IT support tickets consume significant service desk bandwidth, leading to human errors, misrouted issues, and resolution delays.
2	Idea / Solution description	Implement an automated workflow in ServiceNow using Flow Designer to analyze incoming ticket descriptions, match conditions or use machine learning/predictive intelligence, and instantly assign correct categories, subcategories, and priorities.
3	Novelty / Uniqueness	Combines native ServiceNow Flow Designer conditional logic with automated ticket routing to eliminate manual triage overhead and drastically reduce Mean Time to Resolution (MTTR).
4	Social Impact / Customer Satisfaction	Delivers rapid resolutions for end users, significantly reducing frustration and improving employee productivity while easing the workload of IT support agents.
5	Business Model (Revenue Model)	Enterprise ITSM efficiency optimization framework that reduces operational overhead, decreases support costs, and ensures strict SLA compliance.
6	Scalability of the Solution	Easily scalable across multiple enterprise departments (HR, Finance, Operations) and adaptable to handle high volumes of incoming tickets via Self-Service Portals, Virtual Agents, and Email integration.
