Epic 1 – Data Collection

- Collect Ticket Data (USN1) – 2
- Load Ticket Data (USN2) – 1

Epic 2 – Data Preparation

- Handle Missing Values (USN3) – 3
- Clean Ticket Text (USN4) – 3
- Handle Data Inconsistency (USN5) – 3

Epic 3 – Ticket Classification Model

- Extract Text Features using TF-IDF (USN6) – 3
- Train Classification Model (USN7) – 5
- Evaluate Model Accuracy (USN8) – 3

Epic 4 – Flow Designer Integration

- Create Flow Designer Flow (USN9) – 3
- Connect Classification Model to Flow (USN10) – 5
- Automatically Assign Ticket Category (USN11) – 5

Epic 5 – Testing & Dashboard

- Test Auto Classification (USN12) – 3
- Develop Classification Dashboard (USN13) – 5

Model recommendation

உங்க ticket data-ல் **ticket description/title → category** மாதிரி classification செய்யப் போறீங்க என்றால்:

Recommended: TF-IDF + Logistic Regression

Example:

Ticket: “Unable to login to my account”
→ Model predicts: **Login Issue**

Ticket: “Laptop screen is not working”
→ Model predicts: **Hardware Issue**

Ticket: “VPN connection failed”
→ Model predicts: **Network Issue**
