Project Design Phase -II

Solution Requriments(Functional & Non-Functional)

Date	28 september 2026
Team Id	6ab2215e11b716a3e52c637d
Project Name	Auto Ticket classification Using Flow designer
Maximum Marks	4 mark

Functional Requirements

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Automatic Ticket Ingestion	• Ingestion via Service Portal ticket creation • Ingestion via Email-to-Incident triggers • Ingestion via API integration for external systems
FR-2	Text Analysis & Keyword Matching	• Extract short description and detailed body text • Keyword matching sub-flow execution • Confidence score evaluation

Non functional Requirements

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	**Simple and intuitive admin interface within Flow Designer to modify classification rules without custom coding.**
NFR-2	**Security**	**Role-Based Access Control (RBAC) ensuring only authorized admins can edit Flow Designer rules and sub-flows.**
